

Faycal Raghbi

AI engineering student specializing in LLM agents and generative AI

faycal.raghbi@etu.imt-nord-europe.fr | +33 6 52 26 52 49 | [linkedin.com/in/faycal-raghbi](https://www.linkedin.com/in/faycal-raghbi) | github.com/Faycalraghbi

EDUCATION

IMT Nord Europe <i>Engineering Degree in Data Science and Artificial Intelligence</i>	Sept. 2025 – Jul. 2027 Lille, France Mohammed VI
International Academy of Civil Aviation <i>State Engineering Degree in Computer Engineering</i>	Oct. 2023 – Jul. 2027 Casablanca, Morocco Higher school preparatory
classes <i>Two-year intensive program in advanced mathematics and physics</i>	Sept. 2021 – Apr. 2023 Fes, Morocco

CERTIFICATIONS

- Building Generative AI Skills for Developers
- DevOps Foundations
- Oracle Cloud Infrastructure 2024 AI Foundations Associate
- Deep Learning Specialization (Andrew Ng)
- Machine Learning Specialization (Andrew Ng)

EXPERIENCE

Oracle <i>Research Assistant</i>	Jul. 2025 – Sept. 2025 Casablanca, Morocco
– Stabilized an agent execution runtime by diagnosing and resolving critical failures impacting autonomous agent reasoning, execution, and inference reliability. – Refactored database and inference integration layers, strengthening MCP-based orchestration across local and custom LLM backends. – Improved agent coordination, tool-use, and execution patterns, aligned with Agent Spec best practices. – Authored and structured technical documentation covering deployment, orchestration, and observability to accelerate team onboarding.	
Arrow Electronics <i>Technical Intern</i>	Jul. 2024 – Aug. 2024 Casablanca, Morocco
– Validated reliability of a microservices-based system through API testing (Postman), collaborating in an agile engineering environment.	

PROJECTS

Joshu	<i>Python, LangGraph, MCP, FastAPI, GitHub Actions</i>
– Designed and developed an agent-based platform orchestrating autonomous LLM agents with secure tool-use, persistent semantic memory, and context management. – Implemented multi-agent coordination workflows and an Agent-to-Agent (A2A) server exposed via FastAPI and SSE. – Industrialized the project with CI/CD pipelines, automated testing, and cross-platform support, ensuring scalability and reliability.	
LogoCraftAI	<i>Next.js, Mistral, Hugging Face, Firebase</i>
– Built an end-to-end generative AI pipeline, from prompt optimization to production-ready deployment.	
Juridia's Multilingual Legal Translation	<i>Hugging Face, Helsinki-NLP, LoRA, BLEU</i>
– Fine-tuned sequence-to-sequence models using LoRA for domain-specific translation and evaluated performance with BLEU metrics.	

SKILLS

Programming: Python, C++, Java, SQL, JavaScript, Bash

Frameworks: LangGraph, FastAPI, TensorFlow, PyTorch, Scikit-learn, MLflow, Spring Boot, BigQuery, React/Next

Tools: Spark, Kubernetes, Docker/Colima, Linux, Jenkins, Git, Power BI, Jira/Confluence

AI/ML: LLM Agents, MCP, Tool-use, Prompt Engineering, OCI/GCP

Languages: English (Professional), French (Professional), Arabic (Native Speaker)

EXTRACURRICULAR ACTIVITIES

Data Cell Leader – AIAC IT Club

Sept. 2024 – Jun. 2025

- Led a 20-member data team (DS, DE, DA), supervised multiple AI projects, and delivered hands-on workshops in data science and machine learning.
