

Faycal Raghbi

Aspiring ML engineer with hands-on experience in LLM agents and deep learning

faycal.raghbi@etu.imt-nord-europe.fr | +33 6 52 26 52 49 | [linkedin.com/in/faycal-raghbi](https://www.linkedin.com/in/faycal-raghbi) | github.com/Faycalraghbi

EDUCATION

IMT Nord Europe

Engineering Degree in Data Science and Artificial Intelligence

Sept. 2025 – Jul. 2027

Lille, France **Mohammed VI**

International Academy of Civil Aviation

State Engineering Degree in Computer Engineering

Oct. 2023 – Jul. 2027

classes

Two-year intensive program in advanced mathematics and physics

Higher school preparatory

Sept. 2021 – Apr. 2023

Fes, Morocco

CERTIFICATIONS

- Building Generative AI Skills for Developers
- DevOps Foundations
- Oracle Cloud Infrastructure 2024 AI Foundations Associate
- Deep Learning Specialization (Andrew Ng)
- Machine Learning Specialization (Andrew Ng)

EXPERIENCE

Oracle

Research Assistant

Jul. 2025 – Sept. 2025

Casablanca, Morocco

- Stabilized an agent execution runtime by diagnosing and resolving critical failures impacting autonomous agent reasoning, execution, and inference reliability.
- Refactored database and inference integration layers, strengthening MCP-based orchestration across local and custom LLM backends.
- Improved agent coordination, tool-use, and execution patterns, aligned with Agent Spec best practices.
- Authored and structured technical documentation covering deployment, orchestration, and observability to accelerate team onboarding.

Arrow Electronics

Technical Intern

Jul. 2024 – Aug. 2024

Casablanca, Morocco

- Validated reliability of a microservices-based system through API testing (Postman), collaborating in an agile engineering environment.

PROJECTS

Joshu

Python, LangGraph, MCP, FastAPI, GitHub Actions

- Designed and developed an agent-based platform orchestrating autonomous LLM agents with secure tool-use, persistent semantic memory, and context management.
- Implemented multi-agent coordination workflows and an Agent-to-Agent (A2A) server exposed via FastAPI and SSE.
- Industrialized the project with CI/CD pipelines, automated testing, and cross-platform support, ensuring scalability and reliability.

Juridia's Multilingual Legal Translation

Hugging Face, Helsinki-NLP, LoRA, BLEU

- Fine-tuned sequence-to-sequence models using LoRA for domain-specific translation and evaluated performance with BLEU metrics.

LogoCraftAI

Next.js, Mistral, Hugging Face, Firebase

- Built an end-to-end generative AI pipeline, from prompt optimization to production-ready deployment.

SKILLS

Programming: Python, C++, Java, SQL, JavaScript, Bash

Frameworks: TensorFlow, PyTorch, Scikit-learn, MLflow, LangGraph, FastAPI, Spring Boot, BigQuery, React/Next

Tools: Spark, Kubernetes, Docker/Colima, Linux, Jenkins, Git, Power BI, Jira/Confluence

AI/ML: LLM Agents, MCP, Tool-use, Prompt Engineering, OCI/GCP

Languages: English (Professional), French (Professional), Arabic (Native Speaker)

EXTRACURRICULAR ACTIVITIES

Data Cell Leader – AIAC IT Club

Sept. 2024 – Jun. 2025

- Led a 20-member data team (DS, DE, DA), supervised multiple AI projects, and delivered hands-on workshops in data science and machine learning.
